RETURN & REFUND POLICY

1. Standard Return Window

VoltEdge Electronics accepts eligible returns requested within 30 calendar days of the delivery date. The delivery date shown by the carrier is used to calculate the return window. Items must be received by VoltEdge or handed to the approved return carrier within 10 calendar days after a return authorization is issued. Requests made after the applicable return window are not accepted.

2. Condition Requirements

Returned products must include the original device, accessories, cables, manuals, inserts, and packaging supplied with the order. Serial numbers must match VoltEdge order records. Products must not show accidental damage, liquid exposure, unauthorized modification, missing parts, heavy cosmetic wear, or signs of misuse. Customer data must be removed from any device before shipment. Devices should be signed out of personal accounts and any screen lock, activation lock, or passcode must be disabled.

3. Product-Specific Rules

Unopened laptops and smartphones may be returned within 30 calendar days of delivery. Once opened, laptops and smartphones must be returned within 14 calendar days of delivery and are subject to the restocking fee described in Section 4.

Headphones and earbuds may be returned within 30 calendar days if unopened. Opened headphones or earbuds may be returned within 14 calendar days only when they are clean and include all original ear tips, charging cases, cables, and packaging.

Chargers, cables, adapters, cases, keyboards, mice, hubs, stands, and other accessories may be returned within 30 calendar days, whether opened or unopened, provided they meet the condition requirements in Section 2.

4. Restocking Fee

A 15% restocking fee applies to opened laptops and opened smartphones that are returned for preference-based reasons, such as changing color, storage size, or model. The fee is calculated from the item purchase price before tax and shipping charges. No restocking fee applies to eligible unopened items or eligible accessories. If a returned item is missing included accessories or packaging, VoltEdge may deduct the reasonable replacement cost from the refund instead of, or in addition to, any applicable restocking fee.

5. How to Start a Return

Customers must request a return authorization before sending any item back. Start the request through the “Orders” page in the VoltEdge customer account or contact Customer Support by email at support@voltedgeelectronics.com. Provide the order number, item name, reason for return, and requested resolution. If approved, VoltEdge will issue a return authorization number and return instructions within 1 business day. Packages sent without an authorization number may be refused.

6. Return Shipping

For preference-based returns, the customer is responsible for return shipping costs. VoltEdge can provide a prepaid return label, and the label cost will be deducted from the refund. The exact label amount is shown before the customer confirms the return. If VoltEdge shipped the wrong item or the item arrived visibly damaged, VoltEdge will provide a prepaid label at no charge.

7. Refund Method and Timing

Refunds are issued to the original payment method. After the return arrives, inspection is normally completed within 3 business days. Approved refunds are submitted within 2 business days after inspection. Most banks and card issuers post the credit within 3–7 additional business days. Original shipping charges are not refunded on preference-based returns. Taxes are refunded in accordance with the amount actually paid.

8. Non-Returnable Items

The following items cannot be returned: downloadable software or digital license keys after delivery, replacement ear tips with a broken hygiene seal, opened screen-cleaning liquid, used batteries sold separately, items marked “Final Sale,” and products with removed or altered serial numbers. Items that contain customer-added engraving, permanent labels, or physical modifications are also non-returnable.
